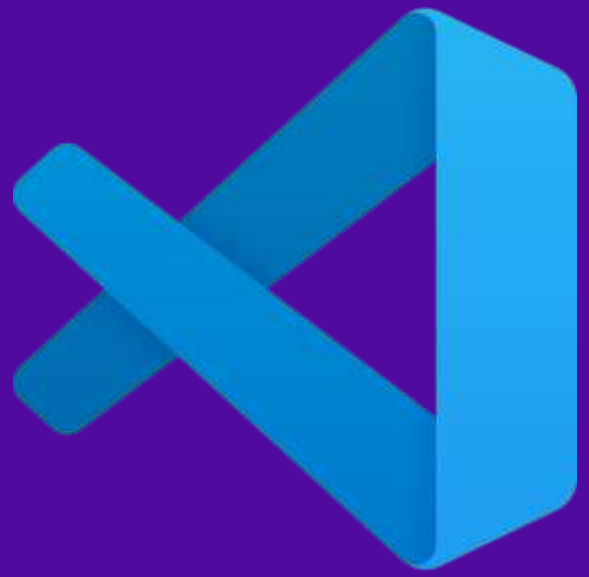
PHP Programming

Laravel 9

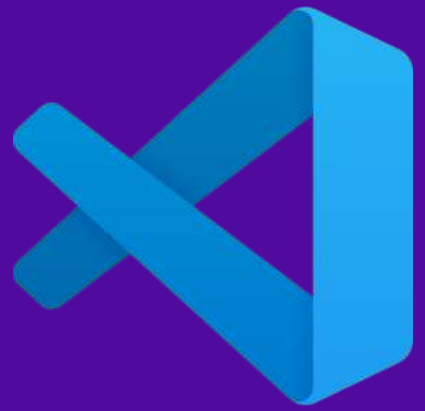
Thanks for watching

Visual Studio Code



- Easy to use, work both MacOS/Windows
- Many userful extensions
- Build-in git, lightweight

VSCode Extensions



Laravel Artisan,

Laravel Blade Snippets

Laravel Blade Spacer

Laravel goto view

laravel snippets

Laravel Extra Intellisense

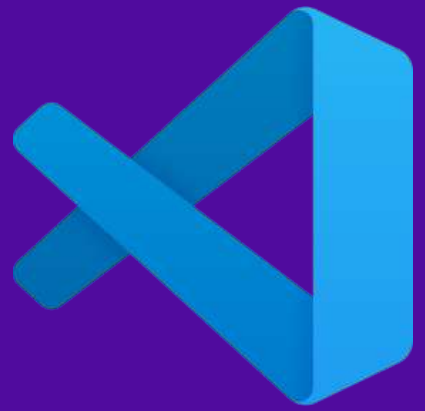
Live Sass Compiler

Beautify css/sass/scss/less

PHP IntelliSense

Getter and Setter Generator

VSCode Extensions



Laravel Artisan,

Getter and Setter Generator

Bracket Pair Colorization Toggler

Vscode-icons

JavaScript (ES6) code snippets

What is .env File ?

It store **environment variables**, use globally in your App

Store in Laravel **App's root folder**

File name is blank: **.env**

What is composer.json ?

It is a file where stores and manages **dependencies / libraries**

Where can I find dependencies ?

You can find Laravel dependencies at:

packagist.org

Basic routing in Laravel

Routing configurations are saved on **routes/web.php**
Examples:

http://server-name:port/

http://server-name:port/**products**

http://server-name:port/**users**

. . .

What do you need ?

- Visual Studio Code
